

**THE RIGHT TO INFORMATION ACT
FARAKKA BARRAGE PROJECT**

4(1)(b)(i)

The particulars of its organization, functions and duties;

Farakka Barrage Project with headquarters at Farakka in Murshidabad district of West Bengal is a subordinate office under the Union Ministry of Water Resources, River Development & Ganga Rejuvenation. The Farakka Barrage Project Authority was set up in 1961 with the mandate to execute and thereafter operate and maintain the Farakka Barrage Project Complex comprising of Farakka Barrage, Jangipur Barrage, Feeder Canal, Navigation Lock and associated structures. The Barrage comprises of 112 Nos. of gates (108 Nos. main gates and 4 nos. Fish Lock Gates) and 11 Nos. Head Regulator gates for diversion of 40,000 cusec (1135 cumec) of discharge into the Feeder Canal. The project construction commenced in 1961 and the project was commissioned and dedicated to the Nation in May 1975. The Farakka Barrage Project has been constructed primarily with view to preserve and maintain Calcutta Port which had been greatly affected over the years because of decreased flow into the Bhagirathi-Hooghly river on the bank of which the city of Kolkata and other cities and a large number of villages are situated.

The Barrage is located at about 300 km North of Kolkata and is the largest Barrage of its kind in the country. It has Feeder Canal for a flow of 40000 cusecs whose bed width is wider than that of Suez Canal, originating from U/s at Right Bank of Farakka barrage and outfalls into the Bhagirathi, right channel of the Ganges at 40 km d/s of Farakka Barrage.

The Bhagirathi is known as Hooghly in its lower reaches which is one of the two channels into which river Ganga bifurcates about 40 km kilometres downstream of Farakka Barrage. The left channel is called the Padma which flows about 90 km along the Indo-Bangladesh boundary before joining the Brahmaputra. About three centuries ago major portion of Ganga waters used to flow into the Bhagirathi thereby ensuring enough flow of water into the Hooghly. Of late Ganga waters flowed largely through the Padma. In the process Hooghly was denuded of water and the Kolkata Port, the premier Indian Port was adversely affected.

Kolkata is the main port providing commercial outlet and inlet for the vast hinterland of northern India extending over West Bengal, Assam, Bihar, part of Orissa, Uttar Pradesh and Sikkim including Bhutan and Nepal.

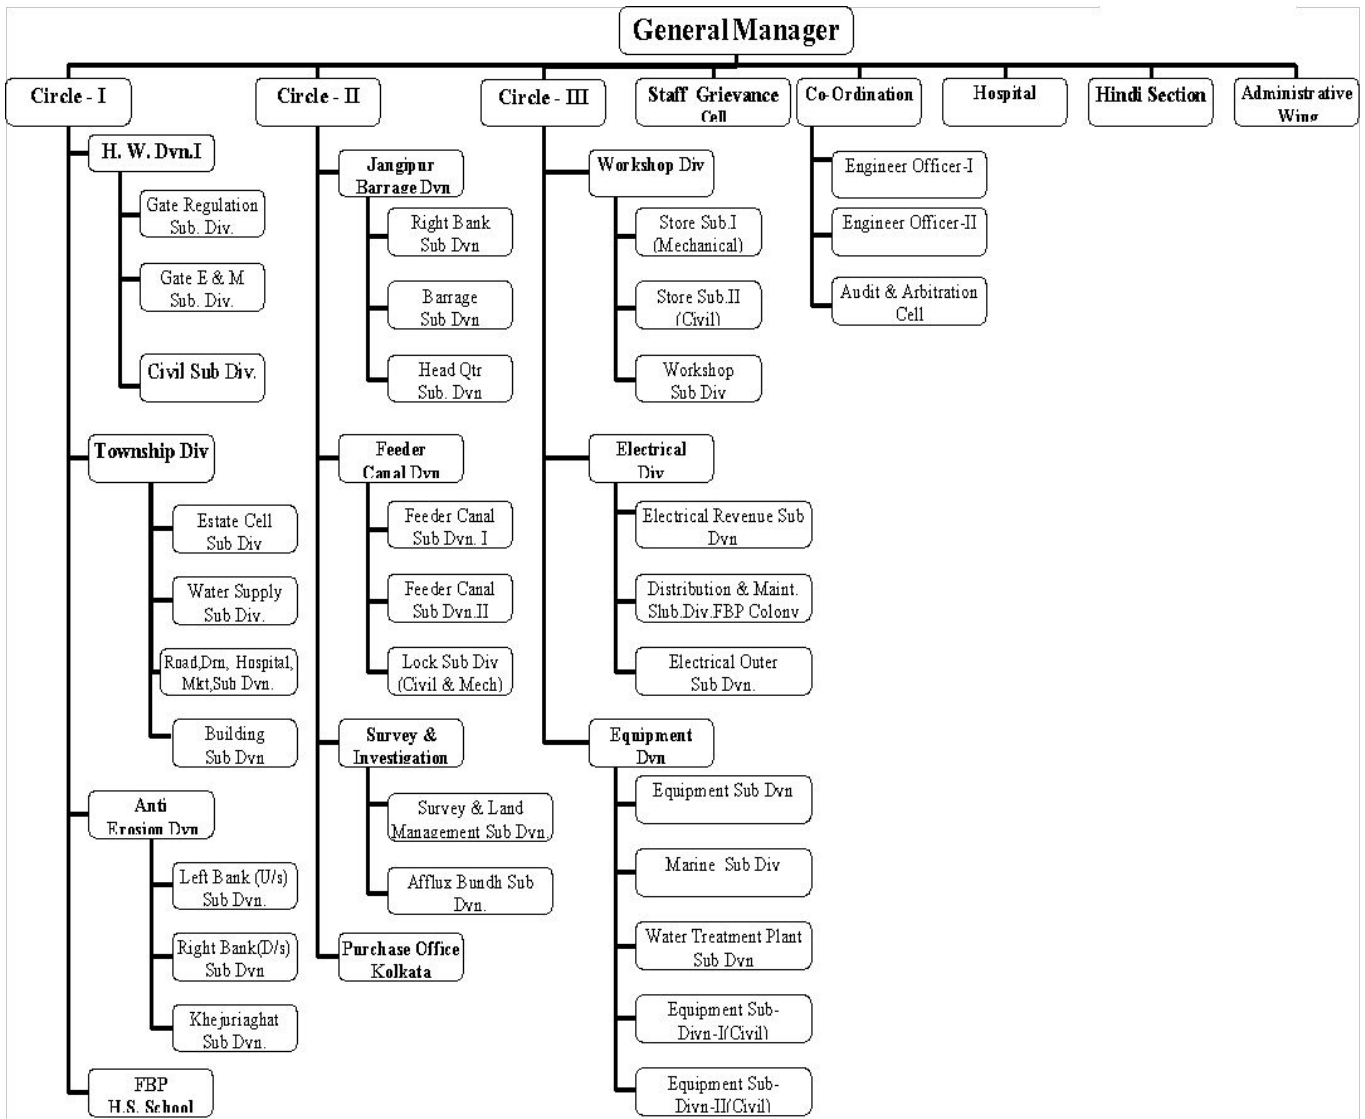

With the completion of the Farakka Barrage, silt free water now flows throughout the year in the river Hooghly. This has increased the navigable depth in the riverine approach of the port and it enables to receive large size ships and handle bigger volume of cargo, thereby improving the economy of the vast hinterland.

The reduction in the upland fresh water supply in the Hooghly had increased the salinity in the water supply system of Kolkata city. With the assured supply of sweet and fresh water throughout the year, the salinity had been reduced substantially. A regular water supply with adequate draft had also improved the navigability in the river Bhagirathi, opening up the National Waterway No.1 for all weather direct river link between Kolkata Port and the States of Bihar and Uttar Pradesh.

The rail and road bridges built over the river Ganga at Farakka had provided direct road and rail link between Kolkata, North Bengal and North-Eastern States as well as for Sikkim, Bhutan and Nepal.

The Project is headed by General Manager and has 3 Circles, 9 Divisions and 27 Sub-Divisions. Besides these units, the Project runs a School and a Hospital. It also has a Liaison & Purchase office at Kolkata.

Organization set up of FBP is as under:

The activities of the FBP has been increased since the year 2005 which now includes taking up of anti-erosion works along the banks of river Ganga in an area 40 km Upstream and 80 km Downstream of the Farakka Barrage besides execution of routine anti-erosion works as well as O&M of Barrage, Head regulator, Feeder Canal, Navigation Lock, Jangipur Barrage, Guide bunds, afflux bunds, maintenance of townships (3 Nos.), School, Hospital etc.

Important activities of Farakka Barrage Project are Operation & Maintenance of:

i) Farakka Barrage

Farakka Barrage is the main barrage of 2,245 m length with 109 Gates of 18.30 m span, designed for a discharge 76,500 cumec across the mighty Ganga at Farakka in Murshidabad District of West Bengal.

ii) Head Regulator

Head Regulator at upstream of Barrage on its right bank with 11 Gates of 12.19 m span, which controls diversion of 40,000 cusec (1,135 cumec) of Ganga Water into Feeder Canal.

iii) Feeder Canal

Feeder canal is 38.38 km long which originates in Farakka from upstream of Barrage, carries maximum discharge of 40,000 cusec (1,135 cumec) into the river Bhagirathi- Hooghly, the right channel of the river Ganga for preservation of Kolkata Port. The Bhagirathi-Ganga waterway is the National Waterway No.1 for inland transport facilities from Allahabad to Kolkata. The vessels are being operated by IWAI.

Feeder canal has several cross drainage structures for communication, irrigation and removal of drainage congestion. It has 17 Nos. jetties for ferry service, two no. of road cum rail bridges and two road bridges, 3 Nos. of inlets and one Syphon and two drainage regulators. Due to fluctuation in discharge and inland transport, failure of slope takes place at several places, which is maintained and repaired.

iv) Navigational Lock at Farakka

Navigational Lock at Farakka facilitates navigation of vessels from Ganga into Bhagirathi via Feeder Canal. The navigation lock is 25.15 m wide and 180.7 m long with two giant sized 25.15 m x 12.60 m on upstream and 25.15 m x 10.52 m in downstream mitre gates. Huge floating caisson type emergency gates are provided for carrying out the repairs to the mitre gates. All the necessary facilities like shelter basins, jetties etc. and fixtures like capstans, gauges, ladders hooks floating mooring bitts, fenders, bollards etc., have been provided to aid the navigation through lock without any disturbance and damage to the vessels. Tugs have been provided for towing. Crafts of size 93 m x 21.8 m weighing more than 1200 tons can pass through the navigation lock.

v) Jangipur Barrage

The Jangipur Barrage having 15 bays of gate size 12.20 m span has been constructed across the river Bhagirathi near its off take from the river Ganga which regulates the flow of Ganga water into the Bhagirathi and vice-versa.

vi) Navigation Lock at Jangipur

There is a Navigation lock on By-pass Channel along side of Jangipur Barrage.

vii) Guide Bunds and Afflux Bunds

- a. There are four guide bunds along both the banks of Barrages at Farakka and Jangipur. These are very important structures which are to be maintained adequately for the safety of the barrages.
- b. Left Afflux bund with inspection road – 34 km, along with several regulators across rivers at Pagla, Tutianala, Nimjala, Bhagirathi and Kalindri,
- c. Right afflux bund (10 km long)

- d. Left bank protection works upstream of barrage protection of river banks and embankments for the protection of thickly populated villages and line of communication behind the embankment.

viii) Township

The Farakka Barrage Project maintains a huge township at Farakka consisting of residential and non-residential buildings (2700 Nos.) and two other Townships at Jangipur (Ahiron) and Khejuriaghat.

ix) Higher Secondary School & Hospital

A Higher Secondary School and 40 bed hospitals for welfare and health care of about 2700 employees including CISF Personnel and a massive workshop at Farakka is also being maintained by Farakka Barrage Project.

x) Ferry Services:

Ferry service at different location of Feeder Canal/ Lock channel – for communication of villagers residing on either banks.

4(1)(b)(ii)

The Powers and duties of its officers and employees;

Farakka Barrage Project officers exercise various powers delegated to them as per Govt. of India rules and regulations as contained in Fundamental Rules, Supplementary Rules, General Financial Rules, Delegation of Financial Power Rules, CPWD Manual, CPWD Accounts code, Delegation of Financial Powers to FBP Officers as amended from time to time. Brief description of duties of FBP officers is given below:

A Sub-Division office under the charge of an Assistant Engineer is the field unit responsible to the Executive Engineer for supervision and executions of works according to the norms and standards laid down for the same in designs, drawings and estimates.

A Division office under the charge of an Executive Engineer is an executive unit directly concerned with procurement of works, material and machinery for speedy and economic execution of the works in its charge through Sub-Divisions and its directly responsible for proper upkeep of the works accounts and implementations of the terms of the contractors entered into with various parties viz. Contractors and Suppliers.

A Circle Office under the charge of a Superintending Engineer ensures discharge of responsibilities by various Divisions under its control and is required to examine the books of Divisional and Sub-Divisional offices during his inspection and see that the matters relating to accounts are attended to personally by the concerned officers. He has to keep a strict watch on expenditure to ensure that there is no excess and that the system of management prevailing in the units is efficient and economical.

General Manager's office under the charge of an officer of the rank of Chief Engineer is assisted by a Superintending Engineer and 2 Engineer Officers for coordinating the technical works and progress of various schemes. For administrative functions, additional sections are attached with the office.

4(1)(b)(iii)

The Procedure followed in Decision Making including channels of supervision and accountability;

The works assigned to FBP and procurement proposals are processed following rules laid down in the Delegation of Financial Power Rules (DFPR), General Financial Rules (GFR), CPWD Manual, Delegation of Financial Powers available to FBP Officers etc. All works are initiated by AE at the sub-division level checked by Executive Engineer at the division level and put up to the Superintending Engineer at the circle level for finalization, and thereafter approved by General Manager.

Channels of Supervision and accountability

Broad channels of supervision in technical and administrative are as follows:

Technical Matters - Channel of supervision in technical matters is as given below:

AE → EE → SE → General Manager (Cases requiring approval of HoD)

Administrative Matters - Channel of supervision in administrative matters is as given below:

Assistant → Section Officer → SR. AO → SE (Coord.) → General Manager (Cases requiring approval of HoD)

4(1)(b)(iv)

The norms set by it for the discharge of its functions;

The norms set by it for the discharge of its functions are as per procedure laid down in the FR & SR.

4(1)(b)(v)

The rules, regulations, instructions, manuals and records, held by it or under its control or used by its employees for discharging its functions;

The rules, regulations, instructions and manuals used by the Farakka Barrage Project is Government of India Rules & Instructions as laid down in the FR & SR.

4(1)(b)(vi)

A statement of the categories of documents that are held by it or under its control;

Documents held/ controlled by the Farakka Barrage Project are in the form of Files, Registers, Technical Data and Reports regarding the Project. In addition, official documents like service books, incumbency register, retirement & death register, drawing register, pay bill register, personal files for individual concerned and other documents as required under CPWD manual like SOR etc are held by its attached and subordinate Offices.

4(1)(b)(vii)

The particulars of any arrangement that exists for consultation with, or representation by, the members of the public in relation to the formulation of its policy or implementation thereof;

Farakka Barrage Project Advisory Committee is constituted by Ministry of Water Resources, RD & GR. Peoples representatives of the Districts of Malda and Murshidabad are included in this Committee.

4(1)(b)(viii)

A statement of the boards, councils, committees and other bodies consisting of two or more persons constituted as its part or for the purpose of its advise, and as to whether meetings of those boards, councils, committees and other bodies are open to the public, or the minutes of such meetings are accessible for public;

Farakka Barrage Project – Technical Advisory Committee is constituted which is headed by the Member (D&R) Central Water Commission. All major decisions on works to be executed are taken by this Committee.

4(1)(b)(ix)

A directory of its officers and employees

Directory of Officers and Employees of Farakka Barrage Project is as under:

STD Codes: Farakka (03485), Jangipur (03483), Kolkata (033)
